2. MISSION:

Our mission is to be an internationally-recognized model for chemical research and education that is to provide an excellent education in chemistry within a liberal arts tradition for a variety of learners to help understand that chemistry is a way of thinking about how matter is constructed, organized, and functions and to provide our faculty with career and research opportunities for their scholarly development.

The Faculty of Chemistry is one of the leading chemistry faculties in Poland. The faculty members are engaged in teaching and research in almost all fields of modern chemistry, including implementation of innovative results in practice. The Faculty offers several types of educational programmes structured in accordance with the Bologna process: 3-year bachelor degree studies bachelor, 2-year master degree studies and 4-year doctoral studies. The Faculty also offers several one-year postgraduate courses directed mainly at high school teachers. The average total enrolment over the last several years reached over 1000 students.
